

# NAGA KARTHIKEYA GUTHI

CSE Graduate | AI & Robotics Enthusiast

+91 8688153653 | nagakarthekeyaguthi2005@gmail.com | linkedin.com/in/naga-karthikeya-guthi-76711a28a | github.com/Karthikeya907 | hackerrank.com/profile/226K1A0582

## PROFILE

Computer Science graduate with a strong interest in Robotics, AI, IoT, and Embedded Systems. Passionate about building intelligent robotic solutions by integrating hardware and software technologies. Eager to apply technical skills, learn emerging technologies, and contribute to innovative engineering projects.

## EDUCATION

**B.Tech – Computer Science & Engineering**

Ideal Institute of Technology, Kakinada | 2022 – 2026

**Intermediate – MPC**

S.B.S.R College, Gokavaram | 2020 – 2022

**Secondary School Certificate (SSC)**

Zilla Parishad High School, Chinturu | 2020

## TECHNICAL SKILLS

**Languages:** Java, Python, C, C++, SQL, HTML, CSS

**Platforms & Tools:** Raspberry Pi, Arduino, Arduino IDE, Git, VS Code, MS Office

**Domains:** Robotics, Embedded Systems, IoT, AI Integration, Computer Vision

**Soft Skills:** Team Collaboration, Problem Solving, Adaptability, Technical Communication

## INTERSHIPS

**Web Full Stack Developer – Virtual Internship**

EduSkills Academy (AICTE) | Oct – Dec 2024

- Developed responsive web interfaces using HTML, CSS, and JavaScript, collaborated on web application development workflows, and gained exposure to backend APIs, databases, and deployment practices.
- Engineered a capstone project end-to-end — from requirement analysis and system design to live deployment — demonstrating practical software development lifecycle experience in an agile environment.

**Advanced Robotics Using AI & IoT – Virtual Internship**

EduSkills Academy (AICTE) | Jan – Mar 2026

- Implemented AI-integrated robotic systems covering machine learning fundamentals for perception, IoT communication protocols, sensor interfacing, and microcontroller programming using Arduino and Raspberry Pi for real-world object detection and environmental mapping.
- Designed and tested an autonomous robotic system with AI-based decision-making, applying Python and embedded C for sensor data processing, real-time control logic, and hardware-software integration.

## PROJECTS

**IRIS – Intelligent Robotic Interaction System**

Raspberry Pi · Arduino · Python · Computer Vision · IoT

- Engineered a 4-foot humanoid robot capable of real-time human interaction, integrating AI-based human detection via computer vision, natural language speech recognition, and a contextual college information assistant — interfaced with camera modules, proximity sensors, and a custom mobile application.
- Designed and implemented the complete hardware-software stack including servo motor control, power distribution, wireless communication, and embedded firmware; collaborated with a multidisciplinary team across the full project lifecycle from prototyping to institutional deployment, earning recognition for innovation in robotics.

**THE APPS – Unified Web Utility Platform**

HTML5 · CSS3 · Vercel CI/CD

Live: [apps-suhc.vercel.app](https://apps-suhc.vercel.app)

- Developed a responsive front-end aggregator platform providing zero-installation browser access to a curated suite of utility applications — optimized for fast load times, cross-device compatibility, and accessible UI using semantic HTML5 and structured CSS3.
- Deployed on Vercel with a continuous integration pipeline enabling automatic re-deployment on every code push, ensuring the platform remains publicly accessible, version-controlled, and production-ready.

## CERTIFICATIONS

- Advanced Robotics Using AI & IoT** — ML for perception, IoT protocols, embedded systems, robotic integration; AICTE-EduSkills (Jan–Mar 2026)
- Web Full Stack Developer** — Frontend, backend APIs, database management, cloud deployment; AICTE-EduSkills via National Internship Portal (Oct–Dec 2024)
- Python Basics for Data Science** — Python programming, data structures, data science workflows; edX · IBM (Jun 2024)
- Java Programming Fundamentals** — Core Java, OOP design, logical reasoning, debugging; edX · Universidad Galileo (Jun 2024)
- HTML5 and CSS Fundamentals** — Semantic web markup, CSS layout, responsive design; edX · W3Cx / W3C (Jul 2024)

## ACHIEVEMENTS & RECOGNITION

- Published research paper: Multi-Object Detection and 3D Spatial Mapping from Images — Dizhen Dizhi Journal (DDJ).
- Completed UI & UX Design Training under Infosys ICT Program — exposure to professional design thinking and user-centered product development.
- Recognised for institutional-level innovation in robotics for the IRIS Humanoid Robot project, contributing from initial concept through to live deployment.
